

Let me introduce you to five-year old, Anibal Rodriquez, who lives on an Indian Reserve in Panama. Born with a serious condition which has only worsened, Anibal now has a protruding tumor on his kidney that is affecting his urine and bowel control. Anibal needs your help. At this point, because his parents cannot even afford diapers, he is unable to attend school. According to Rick and LaTrissia Black, his only real option for a normal childhood is corrective surgery.
